DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 1, Line 12 – wherein a space between the inclined portion and the outer periphery of the sheave becomes smaller with distance, – has been added after “sheave”

Claim 1, Line 17 – when the brake body moves into the smaller space between the inclined portion and the outer periphery of the sheave, – has been added after the phrase “the inclined portion”

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: The claims are patentable over the prior art of record, because the teachings of the references taken as a whole, do not show or render obvious the combination set forth in claim 1 “a gripper metal including an inclined portion caused to incline with respect to the outer periphery of the sheave, wherein a space between the inclined portion and the outer periphery of the sheave becomes smaller with distance, the brake body being meshed

between the outer periphery of the sheave and the inclined portion when the brake body is displaced in the rotation direction.”
